

CB-VAC Power

ADVANCED MAGNETICS

Component Basics – A Specialized Manufacturer & Global Provider of High-Quality Components

CB is a specialized manufacturer, brand, and provider of high-quality components, successfully serving global markets with DC contactors, fuses, and other critical power components. With a strong reputation for reliability, performance, and innovation, CB products are trusted by industry leaders worldwide.

CBVAC Power extends this legacy by offering specialized magnetic solutions, including power inductors, common-mode chokes, and other high-performance magnetics. Designed for high reliability and demanding applications, our products come with fast sample support, expert engineering guidance, and a commitment to quality that ensures superior performance.

- Custom & standard high-quality magnetics.
- Specialized solutions for high-reliability applications.
- Fast sample support & application engineering expertise.
- Global reach with proven industry success.
- Accelerate your design with our Magnetics Sample Kits – featuring a curated selection of high-performance inductors and chokes for rapid evaluation and prototyping.
