

CB-VAC Protect

HV & LV FUSES

CBVAC Protect – Precision. Safety. Reliability.

CBVAC Protect fuses deliver superior circuit protection, safeguarding electrical systems from overcurrent and short circuits with proven reliability. Engineered for critical applications, they ensure operational safety and system integrity, meeting the highest industry standards for performance and durability.

Features & Highlights

- Rated up to 1500VDC, from 10A to 3000A
- High breaking capacity and low I²t
- gPV, aR, and aBAT/gBAT characteristic options
- Slow-blow and fast-acting variants
- UL 248, IEC 60269 compliant
- Custom designs, terminals, indicators, and mounting
- Designed for harsh environments and precision protection
